EXPERIENCE
You Can
TRUST

SACEM is your safe choice for reliable green power generation

YOUR ELECTRICITY BILL CONTINUES TO GROW? DO YOU LOVE EFFICIENCY?

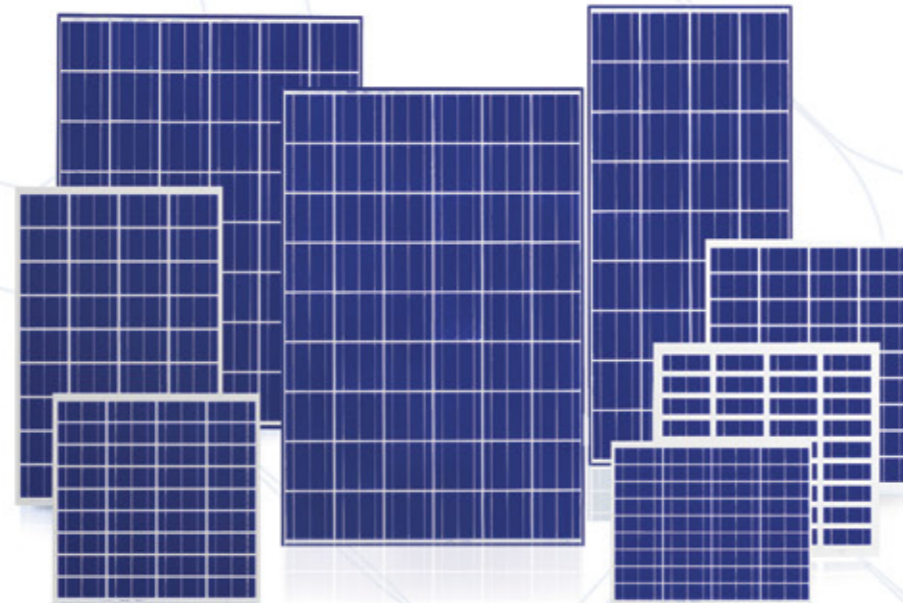

100% guaranteed investment

BETTER VALUE

WE ARE YOUR TRUSTED PARTNER

Products :

- PV Modules
- Inverters
- Solar Pumps
- Solar Batteries
- Charge controllers
- Mounting System
- Accessories

1. PV Modules

SACEM provides the high-efficiency mono and polycrystalline modules. Our **solar modules** are well equipped to meet every need, no matter what it might look like, or where it might be. From desert flat-roof installations, to pitched-roof installations in the mountains or free-field installations on the coast: **SACEM has the right products and the right solutions.**

We supply modules with:

- High performance solar cells.
- Easy installation and operation
- Better mechanical strength and static loading
- Low iron tempered glass with high transmittance
- Reliable product warranty and performance warranty

2. Inverters:

No matter how big or small your system – we all want to make the most out of the available sunlight. That's why our best-in-class inverters offer the most reliable electronic solutions from market leaders across all output classes.

3. Solar pumps

Our Solar pumps are High quality products designed for delivering water economically, cleanly and reliably, anywhere.

Characteristics:

- Easy to install kits
- Pre-assembled kits for moving and pressurizing surface water with solar panels and batteries
- Turn-key water solutions without relying on or paying your utility (off grid)

4. Solar Batteries :

Our batteries are engineered and tested to provide reliable, long-lasting back-up power for photovoltaic and renewable energy applications where frequent deep cycles are required and minimum maintenance is desirable.

Characteristics:

- Highest surge capacity
- Can be used as primary grid tie inverter
- Easy to program, includes system & genstart controller
- Remote/PC communication
- True sine wave provides clean output for sensitive electronic

5. Charge controllers :

We feature a wide range of modern solar charge controllers that are very efficient, they ensure good battery management which extends battery life and reduces associated costs. It can be used for all panels.

6. Mounting systems

We're able to install all leading brands quickly and cost-effectively. Incorporating patented technology and high-quality materials, our mounting systems portfolio optimally support solar modules on any roof – with maximum durability and consistent safety.

7. ACCESSORIES

The functionality of your overall system is only as good as the quality of its smallest part. Thus, even our accessories offer uncompromised excellence. Each accessory is selected to integrate perfectly with our solar systems. So whether it's solar cables, adapters or tools – our extras complete the product portfolio and add efficiency to your system.
