About us

SACEM training Institute benefits of high qualified trainers with experience up to 30 years in their field.

SACEM training organizes a wide range of courses and workshops that cover electricity, transformers, and cables.

Upon request, SACEM training can also develop customized in house training courses. Also we offer **TQM, Six sigma, leadership management courses.**

Subjects covered

- Transformes
- Cables
- Renewable Energy
- Leadership management
- OSHA
- ISO
- TQM
- Six sigma

For whom?

Those courses are designed for engineers and technicians from utility companies, maintenance staff, industrials, installers and operators in power and energy installation.

Goals and benefits

After training, you will have gained both practical and theoretical knowledge. Furthermore you will have the opportunity to share your questions and ideas with SACEM specialists. Also you will share experiences with fellow participants.

Registration

The registration fee includes the course materials, refreshments and might includes the costs of travel and accommodations.

Language

The courses are available in English, French and Arabic

Course material and certificate

Our courses files will be provided, containing all the slides presented during the training courses plus additional notes. This course file will serve as a useful reference afterwards. You will also receive a certificate of participation.
